

INDIANA UNIVERSITY

BLOOMINGTON, INDIANA

DEPARTMENT OF BACTERIOLOGY

July 20th 1948

Dr. J. Lederberg
Dept. of Genetics
University of Wisconsin
Madison, Wis.

Dear Dr. Lederberg:

Thank you for your letter of July first, in which you informed me that you were sending three mutants of K-12:

Y-10

Y-87

58-161.

These cultures have not arrived here to date, and I would appreciate your checking with the post office incase they got lost in transit. I am rather anxious to start the work now, and I am very grateful for any help you can give me in getting the cultures here.

It seems to me that the new single mutants of K-12 which we now have were discussed with you by Dr. Luria at the meeting of the S.A.B. in Minneapolis. We have no new mutants since then.

Would it be possible for me to receive a reprint of 2 of your papers, namely: Genetics 32:505-525, September, 1947, and Jrl. Bact. 53: 673-684, June, 1947?

Thank you for helping with the cultures and reprints.

Yours sincerely,

Ellen E. Kann
